Course Description

This course introduces students to the uneven scope, scale, and pace of change in contemporary Britain. Students interrogate the ways in which different narratives of continuity and change emerged in and about the 20th century in Britain, and the purposes they have served. By exploring different areas of life – from politics, voting, and protesting, to working, shopping, belief, and love – students engage with alternative ways of understanding this period in British history. In this course students tackle big historiographical debates in the field and develop a more complex understanding of the political turmoil, economic uncertainty, and social upheaval of the 20th century.
