UCEAP Course Number 136
UCEAP Course Suffix
UCEAP Official Title ENVIRONMENTAL GOVERNANCE
UCEAP Transcript Title ENVRN GOVERNANCE
UCEAP Quarter Units 3.00
UCEAP Semester Units 2.00

Course Description

This class discusses the international environmental regimes (international regimes: sets of implicit or explicit principles, norms, rules, and decision-making procedures around which actors' expectations converge in a given area of international relations (Krasner, 1983)) and related challenges, including policy-making procedures, the role of actors (international organizations, governments, the scientific community, industry, and non-governmental organizations) which influenced that policy-making, by explaining various international environmental conventions and frameworks under the United Nations.

This course explains governance issues such as the international environmental regimes and the interactions among related international conventions and institutions; multi-level governance (international, national, and local, etc.), and the fragmentation and cohesion of governance. In addition, this course explains theories and analytical frameworks, including transnational governance, which focuses on non-state actors (e.g., cities, non-governmental organizations, and companies); transition management focused on societal systems transformations, and governance related to equity between developed and developing countries.
