COURSE DETAIL

INTRODUCTION TO SUSTAINABLE DEVELOPMENT
Country United Kingdom - England
Host Institution University of Sussex
Program(s) University of Sussex
UCEAP Course Level Upper Division
UCEAP Subject Area(s) Environmental Studies
UCEAP Course Number 108
UCEAP Course Suffix
UCEAP Official Title INTRODUCTION TO SUSTAINABLE DEVELOPMENT
UCEAP Transcript Title SUSTAINABLE DEVELOP
UCEAP Quarter Units 6.00
UCEAP Semester Units 4.00

Course Description

This course provides an understanding of the principles of sustainable development and, in particular, an introduction to the role of science and technology in contributing to key sustainable development challenges. Students explore the origins of the concept of sustainable development and the core ideas that underpin it. The course also examines the ways in which sustainable development is interpreted by different interest groups, along with the assumptions made, and the contradictions that arise. These ideas are illustrated through a series of contemporary case studies, which highlight efforts to address sustainable development challenges from the local to international, and examine the role of science and technology within these contexts.
