Course Description

This course is part of the Laurea Magistrale degree program and is intended for advanced level students. Enrollment is by permission of the instructor. Corporate Finance is an advanced course with a focus on valuation, covering the theoretical framework of corporate valuation issues and the tools to apply valuation models in practical situations. Topics covered include estimating cash flows, the firm's opportunity cost of capital, the role of capital structure, and relative valuation. At the end of the course, students are expected to know and understand, to a greater extent, national and international socio-economic processes and be able to independently draw conclusions based on the collected data; know in-depth mathematical, statistical and qualitative research methods used in research in economic sciences and management sciences; and have in-depth knowledge of their use in the processes of analysis and inference in the field of international business.
