Course Description

This course aims to understand issues in global health and to utilize econometric methodologies to improve health policies in one's own countries. The first half of this course discusses global health/health systems reforms in the Asia-Pacific Region while the second half introduces impact evaluation by presenting a detailed analysis of quantitative research underlying recent program evaluations and case studies. This course works extensively with Stata.

Students are required to have basic knowledge on statistics and econometrics.

Language(s) of Instruction
English
