Course Description

This course provides students with fundamental financial concepts and theories as well as the applications in making corporate financial decisions. Part I introduces basic concepts in finance such as financial assets, opportunity cost, PVs, FVs, and NPVs. Part II demonstrates how to make firm investment decisions based on the calculation of project PV and other criteria. Part III explains why the opportunity cost of capital (the required rate of return, or the discount rate) is determined in the security market, or, the CAPM. Part IV discusses financing decisions, mainly how to financing with debt and equity and decide the optimal capital structure.
