**Course Description**

This course helps students gain a science-based understanding of some of the most intriguing phenomena in the workplace and society. Students develop analytical skills that are crucial for both academic and industry careers. Students who are interested in understanding the Asian business environment are especially encouraged to take this course. It draws upon scientific research from various disciplines, including psychology, sociology, history, and anthropology, to critically examine topics such as creativity and innovation, emotions at work, leadership, cross-cultural differences, and management in an Asian context
