Course Description

This is a project-based course where students work in a team to carry out the development and management of a relatively large scale software project, building a piece of software to fulfil the needs of a particular customer. Students put into practice state-of-the-art techniques used in industrial software development to ensure that their team produces software cooperatively, reliably, and on schedule. Each team works on a different project, and receives individual coaching to provide support and advice relevant to their particular project.
