Course Description

In this course, students engage with fundamental principles of sound creation and manipulation though exploration of sound design practices in a range of contexts including game sound, virtual reality and other interactive media, film, TV, radio, theater, and live sound applications. By examining the work of influential sound design practitioners, students explore sound design methodologies and techniques. This includes field recording, synthesis, multichannel spatialization, Foley, and the manipulation of sound recordings using DAWs and analog recording devices to achieve a desired aesthetic.
