N

UCEAP Official Title

PLANETARY EMERGENCIES: FROM ANALYSIS TO ACTION

UCEAP Transcript Title

PLANETARY EMERGENCY

UCEAP Quarter Units

6.00

UCEAP Semester Units

4.00

Course Description

In the face of threats of the seventh mass extinction and climate collapse, a planetary emergency has been declared by scientific and intergovernmental bodies. People across global civil society are coming together to respond. This course provides an interdisciplinary perspective on interacting dimensions of key socio-environmental challenges of the 21st century, and responses to them. Considering crises in land, food, water, and biodiversity, students critically analyze the intersections between systems of power and complex environmental processes, and the diverse ways in which people relate to nature and society.
