UCEAP Semester Units

4.00

Course Description

In this course, students learn about the different conceptualizations of emotion both in terms of historical developments as well as contemporary theoretical models of emotions. The course considers the biological basis of emotions in the brain and the body, how emotions are expressed and perceived in faces, bodies, voice, and music. The relationship between emotions and cognitions is considered, including emotion regulation and individual differences in emotions. Finally, cultural differences and disorders of emotion are discussed.
