4.50

UCEAP Semester Units

3.00

Course Description

Topics are chosen according to specific interests, such as sociology of medicine, sex roles, symbolic interaction, or applied sociology. A recurring theme in attempts to understand the nature and emergence of the contemporary world is the relationship between capitalism and colonialism. Not only have the attempts to understand this relationship been important to academic discussions, they have also shaped the rhetoric and actions of policy makers, international institutions, and anti-colonial movements.
