**UCEAP Semester Units**

2.00

## Course Description

The course encompasses a wide range of topics and is inherently interdisciplinary. Fostering a participatory learning process, the course includes lectures with real-time examples of energy issues at the local, national, and global levels while focusing on the policy aspects of energy and their associated environmental impacts. The course acquaints students with various subjects, including energy economics, energy policy, and energy finance. Additionally, it familiarizes students with topics such as renewable energy, sustainable development, and green finance.

Class format: Online (mainly real-time format)
