Course Description

The field of Economics has a complex history marked by contradictions. On one hand, it is a history of disagreement and changes, but on the other, it is a persistent effort to address crucial questions facing society. This interplay of discontinuity and continuity has shaped Economics into the theory we study today. By tracing the evolution of the science, one can gain a deeper understanding of its essence and how it has developed into its current form.

By the end of this course, students are expected to have:

- Developed an in-depth understanding of the context of contemporary economic theory.
- Acquired knowledge of the various schools of economic thought.
- Developed an understanding for why economics has changed over time.
