UCEAP Transcript Title ENV&CLIMATE CHANGE
UCEAP Quarter Units 3.00
UCEAP Semester Units 2.00

Course Description

This course examines the long-term perspectives of environmental and climate change policies in France and Japan, considering historical developments, current challenges, and future prospects. It engages with a range of sources in French, English, and Japanese to develop a comprehensive understanding of the policies, strategies, and frameworks implemented in the context of environmental and climate change. The course provides an opportunity to develop one's ability to analyze and compare the approaches and effectiveness of environmental and climate change policies between France and Japan.

This course will be essentially taught in English and, depending on the students' proficiency level in French, will use some or many documents in French.
