UCEAP Course Suffix
UCEAP Official Title COMPARATIVE HEALTH CARE SYSTEMS
UCEAP Transcript Title HEALTH CARE SYSTEMS
UCEAP Quarter Units 4.50
UCEAP Semester Units 3.00

Course Description

This course explores the impact of demographics, infrastructure, political and public will, global economic conditions, and geopolitical circumstances on healthcare systems. Topics include evidence-based health policy research and the need to carefully assess healthcare delivery systems in individual countries to identify initiatives, patterns, and mechanisms that have most likely contributed to successful reforms and sustainable financing arrangements. Students examine comparisons among European Union and other actors with special reference to the debate on health care in the United States. Students learn about, assess and understand these unique interests, needs, and historical experiences that shape current health care at the national level. Visits to private and public health institutions in all student locations are included and compared for a multinational/multicultural understanding.

Language(s) of Instruction
English
