Course Description

People eat in order to survive. Eating patterns also tell a story of personal preferences, socio-economic status, and cultural or ethnic background. In this class, students will gain insight into the historical background of several culinary traditions in Germany, their role in modern-day multi-ethnic German society, and contemporary issues related to food consumption and sustainability in food supply. Topics such as obesity, eating disorders, food allergies, food regulation, and the rise of the "gluten-free" trend place the themes in a public health framework.

Language(s) of Instruction

English
