Course Description

This course, intended for students who are not majoring in medicine, covers the scientific understanding of death, and analyzes the historical/philosophical implications that form the basis of this knowledge, thereby enhancing student abilities to analyze various social phenomena caused by death in modern society.

The course presents scientific data related to death, fostering a rational way of thinking through ethical/philosophical considerations of this phenomenon that are necessary in modern society. Topics include mankind’s historical awareness of death; social consensus and philosophical implications related to death; scientific analyses in the fields of pathophysiology, toxicology, and socio-medical science; and scientific approaches to complex social phenomena related to death in modern society.
