# **UCEAP Transcript Title**

**EU&WORLD CHALLENGES** 

# **UCEAP Quarter Units**

4.50

## **UCEAP Semester Units**

3.00

## **Course Description**

This course provides a better understanding of the European Union and how it operates, and reflects on how it can (or cannot) respond to the major challenges facing the world today. It considers questions such as: How will the European Union cope with these challenges? Will it be able to continue building its strategic autonomy? Will it be able to offer Ukraine the support it needs, both militarily and politically, in a landscape where voices are being raised in both the Council and Parliament against enlargement? And how will it pursue its own objectives? How can we respond to the challenge of climate change, at a time when the Green Pact is being undermined by the energy crisis and growing contestation from a section of the population and the political class? The course discusses a new political sequence opening up for the EU, with the renewal of its leadership and a new balance of power in Parliament, and the context of this new configuration taking place against a backdrop of unprecedented geopolitical tensions.
