Course Description

This course explores changes to our global environment in the Anthropocene and practices used to solve these impacts. It poses questions of current sustainability and global system failure, such as can we design a society and economy that is sustainable, democratic, and prosperous? This course uses a broad interdisciplinary approach to build understanding of central issues of sustainability. Students critically examine sustainability through the lens of culture and societal change, political conflict, ecological economics, global environmental issues, globalization and development and ecological design.
