UCEAP Quarter Units 6.00
UCEAP Semester Units 4.00

Course Description

This course addresses one of the most important contemporary issues - responsible data use. The concept of responsible data is based on understanding the individual and societal collective duty to prioritize and respond to the ethical, legal, and social challenges coming from the use of data. The key elements of responsible data use - data privacy, data protection, and data ethics - are discussed in detail. The main feature of the course is to bring all these three elements together and to discuss them in the context of the contemporary legal and technological environment as well as future development.
