UCEAP Course Suffix
UCEAP Official Title THEORIES ON INNOVATIVE AND SUSTAINABLE REGIONS
UCEAP Transcript Title INNOVT&SUSTINREGION
UCEAP Quarter Units 6.00
UCEAP Semester Units 4.00

Course Description

This course introduces the track on innovative and sustainable regions and sets the ground for the next course on themes. A broad perspective on innovation and sustainability is adopted. Innovation goes beyond creating economic opportunities only and addresses broader issues including quality of life and job opportunities for different types of workers; environmental sustainability and greening of firms and industries; the ability of regions to renew their profiles in response to major crises and to secure their economic development in the long run. Sustainability captures the ability of regions to innovate and renew itself and respond to major shocks (economically sustainable), to be socially inclusive (socially sustainable), and to green their economies (environmentally sustainable).
