UCEAP Course Number 129
UCEAP Course Suffix
UCEAP Official Title EMERGENCE OF TECHNOLOGIES
UCEAP Transcript Title EMERGENCE OF TECH
UCEAP Quarter Units 5.00
UCEAP Semester Units 3.30

Course Description

The emergence of technology requires the study of how history, science, economics, sociological effects, materials, sources of power, climate, and human ingenuity, all play a part in the development and adoption of new technologies. This program of study gives students an introduction to a wide range of technologies and exposes them to new concepts and helps them to question established “truths” regarding the linkages between basic science, research, and the mechanisms involved in the emergence of new technologies. The course is invaluable for students who want to become entrepreneurs because it familiarizes them with new technologies and makes them aware of the many factors that underpin the successful development and adoption of new technologies.

Language(s) of Instruction
English
