3.70

Course Description

The course includes international hybrid workshops by lecturers of all partner countries on technologies and background information necessary to develop sustainable community-based projects. Topics include intercultural communication, PV training, CO2compensation, household biogas plants, clean cooking, biogas, social business; international student hybrid working groups developing CO2compensation projects for climate and SDGs tackling the needs of the local partner communities together with the partner NGOs; practical Service elements contributing to the success of the project for the partner community and to the climate action (including, e.g., training sessions in schools, fundraising events, activities in waste management, organic gardening, tree planting); and research and innovation opportunities to deepen the development and application of sustainable technologies and methodologies.
