HISTORIES AND FUTURES OF CLIMATE CHANGE
Country Ireland
Host Institution Trinity College Dublin
Program(s) Trinity College Dublin
UCEAP Course Level Upper Division
UCEAP Subject Area(s) History
UCEAP Course Number 167
UCEAP Course Suffix
UCEAP Official Title HISTORIES AND FUTURES OF CLIMATE CHANGE
UCEAP Transcript Title HIST:CLIMATE CHANGE
UCEAP Quarter Units 5.00
UCEAP Semester Units 3.30

Course Description

This course introduces students to the environmental humanities, a multidisciplinary formation that brings the visual arts, literature, theatre, history, music, languages, philosophy, politics, law, film, media/cultural studies, anthropology, and cultural geography, into relation with the sciences in response to the environmental crisis. The course focuses on how history/history of art and architecture have responded to the challenge described by Chakrabarty and how these disciplines now contribute to the project of the environmental humanities by rewriting histories and reimagining futures. Students will learn about the climate crisis as a product of modern histories, including histories of science, extractive economies, technology, and media. The course also critically appraises concepts that feature prominently in public and academic debates about the climate crisis, such as Sustainable Development, the Anthropocene, and Planetary Boundaries.

Language(s) of Instruction
English
