Course Description

The course familiarizes students with core concepts and techniques used in farm financial management. It teaches students concepts that assist with appraisal of farm financial management performance and enable informed business decision making. Students study techniques and principles of farm business financial analysis, planning, and strategic decision-making. Topics include operational and strategic principles of farm business management; preparation and analysis of basic farm management accounts; application of farm planning techniques: enterprise, partial and whole farm budgets; farm financial control and cash flow budgeting; and assessment and management of risk in farm decision-making.
