UCEAP Official Title HEALTH ECONOMICS
UCEAP Transcript Title HEALTH ECONOMICS
UCEAP Quarter Units 4.50
UCEAP Semester Units 3.00

Course Description

This course is an introduction to the field of health economics, a rapidly growing field of applied economics. Economic concepts such as scarcity, incentives, marginal analysis, profit maximization, and cost-minimization will be used throughout this course. Students will analyze this important sector using economic analysis methods.

Topics include the production of health capital; demand-and-supply analysis of health and medical care; the production of health; asymmetric information in insurance markets; the role of government in the provision of health care; economics of mental health and happiness; and health policy debates in developing countries.
