Course Description

This course focuses on the process and theoretical background of The European Union (EU). It explores its formation by three creative processes: deepening of the integration, enlargement of the EU, and economic transformation in former socialist countries. After introducing those processes and some theoretical background, students analyze different EU economic policies. Considering that the participants are American undergraduates, this course systematically compares and contrasts the EU and its role in the world with the USA. Preliminary knowledge of principles of microeconomics is strongly recommended, but all necessary theoretical concepts are briefly summarized as part of this course.
