**Course Description**

This course investigates consumer and producer behavior more in-depth and modern microeconomics. Special attention is paid to situations where uncertainty plays a role, to strategic interaction (game theory) and to the consequences of adding psychologically more realistic assumptions about behavior to the mainstream microeconomic model (behavioral economics). The course studies the mechanisms that help us understand that societal and environmental problems are as diverse as nature itself, and that understanding the economics of a more regenerative society requires the study human economic activity in interaction with social, psychological, physical and biological processes. Students are expected to have knowledge of: Microeconomics, Institutions and Welfare (ECB1MI) or Principles of Microeconomics (EC1PME); Mathematics for Economists (ECB1WIS); Statistics (ECB1STAT).

**Language(s) of Instruction**
English

**Host Institution Course Number**
ECB2VMIE

**Host Institution Course Title**
INTERMEDIATE MICROECONOMICS, GAMES, AND BEHAVIOR
