Course Description

This course is a painting studio course focusing on two main approaches: creative expression and technique building via the perspective of contemporary art from the 20th and 21st centuries, and a central emphasis upon the concept of 'multi-sensory art' which is an emerging technique used to create new art by combining visual and sound elements.

Students will learn about sound art and techniques for manipulating digital sound on a computer to gain a basic understanding of sound in art, exploring the connection and mapping between painting and sound(music), with a focus on visualizing and spatializing sound (music) or sonifying paintings and images. Students will work on a final project using the above techniques.
