UCEAP Course Suffix B
UCEAP Official Title ARTIFICIAL INTELLIGENCE AND THE PHILOSOPHY OF SPACE
UCEAP Transcript Title AI PHILOSOPHY SPACE
UCEAP Quarter Units 4.50
UCEAP Semester Units

3.00

Course Description

This course explores the use of ChatGPT, a large language model, as a tool for engaging with philosophical questions and problems. The course instructs how to interact with ChatGPT to generate responses to philosophical questions and covers a range of topics on the philosophy of space. For instance, the course seeks to answer the questions: Does space exist like a substance in its own right, or is it nothing but spatial relationships between objects? Are there objective facts about the geometry of space, or are they in some way conventional?

Overall, this course aims to develop students' critical thinking and analytical skills by providing them with a unique opportunity to engage with philosophical questions using cutting-edge technology.

Language(s) of Instruction
English
