Course Description

This one-unit elective course is designed for junior students in the Department of Chemistry who are interested in contemporary research in chemistry-related fields. The prerequisites for this course are General Chemistry (I)(II), Organic Chemistry (I)(II), and Analytical Chemistry (I)(II). Students are expected to attend a weekly group seminar, and give one to two 30-minute oral presentations of literature review or their research progress. Students are not required to enroll in this course concurrently with Chem 3041: Research Training for Junior (I).
