## Course Description

Ecology is a highly practical discipline that is closely related to daily life and social and economic development. Learn this course, realize the relationship between man and nature, the impact of human activities on the living environment and the root causes of many environmental problems, and constantly improve ecological literacy, cultivate

environmental awareness, and form a sustainable development concept.

The course is divided into five progressive parts:

- (1) Understanding ecology
- (2) the best ecological concepts to understand
- (3) Thinking like an ecologist
- (4) Advancing Ecology
- (5) Thinking and politics in ecology<sup>1</sup>
