Course Description

Using multidisciplinary approach – including philosophy, sociology, political science, psychology, management, anthropology, communication, history, and law - to provide a better understanding of how the Internet works and how people on the Internet tend to behave. We not only look back at the past, but also need to grasp now, and at the same time look to the future. Ultimately, we will find that it is ideas that change the world, not just technology, capital or institutions.
