UCEAP Semester Units

4.00

Course Description

The course provides a general introduction to the discipline of archaeology within a global framework, including its goals, basic theoretical principles, techniques, and its development. Emphasis is on the multi-disciplinary nature of archaeology, its relationships within the 'parent' disciplines of history and anthropology, and the range of sub-disciplines with archaeology itself. Students will become familiar with the numerous types of archaeologies that are available as potential career choices, as well as the scientific techniques and technological approaches used by different archaeological professionals. Most aspects of fieldwork (survey and excavation) and post-excavation analysis will also be examined.
