Course Description

This course equips students with fundamental skills and conceptual knowledge essential for investment professionals, including money managers, security analysts, and investment advisors. Students gain a strong foundation in the theoretical principles and practical applications of portfolio investment techniques, with an emphasis on using Python for financial analysis. Additionally, the course incorporates discussions on recent financial news relevant to lecture topics, enhancing students' understanding of real-world investment scenarios.

The course covers the following topics: The Investment Environment; Portfolio Theory and Practice; Equilibrium in Capital Market; Fixed-Income Securities; Security Analysis, and Options, Futures, and Other Derivatives.

Recommended prerequisites: Basic knowledge of statistics and understanding of introduction to microeconomics.
