Course Description

This graduate-level course prepares students for theoretical research in financial markets and is based on journal articles and working papers. The first part of the course discusses different methods to facilitate transactions. The course introduces secured and unsecured credit, and compares the difference between credit and money. The second part of the course discusses search and matching friction in the financial markets, discussing models applying search and matching friction to study stock markets, housing markets, and bond markets. The last part of the course discusses the current development of fintech, introducing the theory behind cryptocurrencies and analyzing how digital currencies influences the current economy.
