### **Course Description**

This course explores how labor markets work and analyzes a wide range of labor issues within Japanese and US economies. Each class begins with the theoretical background of labor economics, then students analyze a related research article to understand how and whether the standard, neo-classical model is applied to real economic life.

The regular version of this course is worth 3.0 UC quarter units. The Q version of this course is worth 4.5 UC quarter units. Students must submit a special study project form which outlines the requirements for the additional units. This is typically an additional paper graded by the instructor of the course.
