FROM SHERLOCK HOLMES TO CSI: A HISTORY OF FORENSIC MEDICINE

UCEAP Transcript Title
FORENSIC MEDICINE

UCEAP Quarter Units
8.00

UCEAP Semester Units
5.30

Course Description

The course introduces students to selected topics in the legal application of medical scientific expertise. Students learn about the historical development and application of forensic investigation techniques such as toxicology, psychiatry, crime scene investigation, and DNA profiling, and how they were presented to the public in various media (e.g. detective fiction, newspaper reports, forensic television dramas). Students consider who make claims to forensic truth and what tools and techniques they use to arrive at that conclusion.

Language(s) of Instruction
English
