Course Description

This course focuses on developing a deep understanding of how culture influences individual cognition, emotions, and behavior, and analyzes psychological differences between groups and individuals from diverse cultural backgrounds. The course explores how human behavior and thinking are shaped and changed within cultural contexts.

Main topics in the first half: Understanding theoretical foundations include cultural values and beliefs, cognitive psychology and culture, cultural identity, and polarization and cultural psychology. Main topics in the second half: Understanding practical phenomena and finding solutions include culture of effort worship, face-saving culture, lookism culture, hierarchical culture, and other-oriented culture.
