CHANGING NATURES
Country United Kingdom - Scotland
Host Institution University of St Andrews
Program(s) University of St Andrews
UCEAP Course Level Upper Division
UCEAP Subject Area(s) Environmental Studies
UCEAP Course Number 140
UCEAP Course Suffix
UCEAP Official Title CHANGING NATURES
UCEAP Transcript Title CHANGING NATURES
UCEAP Quarter Units 8.00
UCEAP Semester Units 5.30

Course Description

In this course, students develop appreciation for the diverse ways that natures are known, protected, and changed. It provides students with the skills to: (1) critically engage with histories and contemporary uses, languages, and concepts of nature and sustainable development; (2) critically reflect on our relationship to nature, as a basis for formulating strategies for action; (3) understand the fundamental, long-term functioning of coupled human and environmental systems, and the implications for sustainability; and (4) practice interdisciplinarity, synthesizing different forms of knowledge for sustainability or exploring their apparent contradictions. The course brings together both the natural and social sciences. It explores the roles of people, politics, and policies, and the nature of change that is required to meet contemporary challenges.

Language(s) of Instruction
English
