Course Description

This course provides an overview of the dynamics of the global financial and international monetary systems. It develops knowledge of the fundamental concepts needed to understand foreign direct investment, financial flows, international trade, and investment deals. As political risk and economic exposure to global events have become more immediate, special attention is given to the 2007-2012 world banking crisis, the role of central banks in the stabilization of national economies, national debts, and the specific economic challenges to which individual countries have been exposed in varying ways. Alternative views and policy measures to help struggling economies overcome the economic and financial crisis like contracting (or expanding) government spending are assessed and critically analyzed.
