

COURSE DETAIL

IMMUNOLOGY	
Country	Hong Kong
Host Institution	University of Hong Kong
Program(s)	University of Hong Kong
UCEAP Course Level	Upper Division
UCEAP Subject Area(s)	Biological Sciences
UCEAP Course Number	123
UCEAP Course Suffix	
UCEAP Official Title	IMMUNOLOGY
UCEAP Transcript Title	IMMUNOLOGY
UCEAP Quarter Units	5.00
UCEAP Semester Units	3.30

Course Description

This course studies animal immune systems and the application of a variety of immunological methods to research and diagnosing diseases. Topics include: immunological functions in vertebrates and analogous activities in invertebrates; structures and biological properties of immunoglobulins and T-cell receptors; divergence of antibody genes; emergence and characteristics of lymphoid tissues; major histocompatibility complex; complement pathways; immunity against bacteria, viruses, and parasites; AIDS: vaccinations, hypersensitivity, and autoimmunity; and immunological tests and immunochemical techniques using non-mammalian and mammalian antibodies and their application to various biological problems.
