Course Description

The course provides students with the conceptual and theoretical framework surrounding valuation issues and the practical tools to address such topics in real-life situations. The main methodologies of corporate valuation are analyzed and the approaches commonly used by practitioners (financial analysts, investment and merchant banks, consulting firms) are critically discussed. Examples focus on corporate valuation issues using DCF, stock market and deal multiples completed by industry-specific as well as case-specific valuation techniques. Prerequisites: knowledge of basic financial accounting and basic corporate finance.
