Course Description

This course debates issues in green transition in Africa with a focus on governance of natural resources at and between local, national, and international levels. It develops an understanding of key concepts including theories related to governing natural resources towards a green transition in Africa and discusses specific cases from Africa related to green transition with a focus on utilization and/or conservation of Africa's natural resources. The course critically discusses actors in Africa's development and the role they are playing in green transition by governing natural resources in Africa. It considers issues related to green transition linked to discussion about scarcity and abundance, debates conservation in Africa related to the role of state, marked and civil society, and discusses impact and coping strategies related to climate change in Africa.
