Course Description

This is a project-oriented class covering trending and novel Human-Computer Interaction (HCI) research topics. This course focuses on Human-centered AI.

The course surveys recent award-winning HCI papers for insight, with students undergoing through a complete HCI research cycle: Identifying a research question and reviewing related work to exploring solution design spaces; prototyping; conducting user studies, and writing a short paper.

Previous class projects have been published in top HCI conferences (e.g., ACM CHI, UIST, SIGGRAPH, and MobileHCI) and have received multiple Best Paper/Honorable Mention awards.

Language(s) of Instruction
