UCEAP Semester Units

1.00

Course Description

This graduate research course provides training in experimental skills and scientific presentation for doing research in the field of Ecology and Evolutionary Biology. Students choose their own research topic and perform research under the guidance of a subject matter expert in their field. The course varies depending on the research topic but it may include weekly lab meetings; presentations of up-to-date research articles, and participation in scientific discussion with the instructor and lab colleagues.
