**Course Description**

This course offers a comprehensive introduction to the world of insects and addresses common misconceptions. Through a combination of classroom lectures and hands-on field trips, the course explores the fascinating world of these six-legged creatures. Field trips include visits to the NTU campus, the NTU Insectarium, the Taiwan Insect Museum, Fuyang Ecological Park, and Zhinan Temple. These excursions aid the observation and identification of insects in their natural environments, using field guides and direct observation.

Lectures cover a range of subjects, including insect morphology, systematics, diversity, ecology, and behavior. Additionally, guest lectures from faculty at NCHU/NCU and industry experts provide valuable insights and broaden students' perspectives.

**Language(s) of Instruction**
English
