12.00

UCEAP Semester Units

8.00

Course Description

The course addresses the relations between art and anthropology, and explores what anthropologists can say about aesthetic experience through a range of ethnographic examples. It explores the growing epistemological entanglement of contemporary art and anthropology. Contemporary artists are increasingly concerned with anthropological issues and the "art world" is continuously growing, embracing new artists and communities. What understanding can anthropology bring to the questions that plague contemporary art? Can the work of contemporary artists help anthropology develop new forms of research and output?
