**Upper Division** 

## **UCEAP Subject Area(s)**

Anthropology

### **UCEAP Course Number**

141

#### **UCEAP Course Suffix**

#### **UCEAP Official Title**

INTRODUCTION TO BIOLOGICAL ANTHROPOLOGY

## **UCEAP Transcript Title**

INTRO TO BIO ANTHRO

## **UCEAP Quarter Units**

6.00

#### **UCEAP Semester Units**

4.00

### **Course Description**

This course covers basic evolutionary biology as applied in biological anthropology, covering evolutionary theory, socio-biology, and primate behavior. The course combines weekly lectures with tutorials, where students discuss key readings linked to issues presented in the lectures, gain scientific comprehension skills, and learn how to communicate scientific findings in biological anthropology to the public. Major topics covered include a summary of the history of the theory of evolution, genetics and heredity, sexual selection, nature and nurture, and human biological diversity; and an outline of the taxonomy, anatomy, ecology and behavior of primates, as well as primate conservation.

## Language(s) of Instruction

English
